PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience building production-grade dispatch and mobile applications for the public safety domain at Octave (formerly Hexagon). Proficient in React.js, React Native, TypeScript, Java, and Spring Boot, with hands-on experience integrating RESTful APIs and microservices. Delivered a 30% performance improvement through component-level optimization and contributed to features now used by emergency responders across multiple enterprise clients. Experienced with Azure DevOps, Firebase, and SQL in agile team environments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Java

Frontend: React.js, React Native, Redux

Backend: Spring Boot, REST APIs, Microservices, SQL, Firebase

Tools & Platforms: Azure DevOps, Git, Stripe, JWT

EXPERIENCE

Octave (formerly Hexagon Public Safety and Infrastructure), Senior Software Developer | July 2023 – Present

- Built and maintained responsive UIs for **OnCall Dispatch (React.js)** and **OnCall Mobile (React Native)**, deployed to enterprise clients in the public safety sector across North America and Europe.
- Improved application rendering speed by **30%** through strategic component memoization and debouncing, reducing redundant re-renders and unnecessary API calls for a dispatch tool used by hundreds of emergency response operators.
- Led migration of legacy class-based components to **functional components with React Hooks**, reducing codebase complexity and improving long-term maintainability across the OnCall platform.
- Designed and shipped a **Runtime Customization feature** enabling enterprise customers to dynamically modify UI layouts via JSON configuration—eliminating custom build requests and reducing client onboarding time.
- Developed and integrated **RESTful APIs using Java and Spring Boot** within a microservices architecture, implementing business logic and optimizing SQL queries to improve data retrieval efficiency across dispatch workflows.

Medtronic Engineering and Innovation Centre, Software Engineer Intern | Jan 2023 – May 2023

- Contributed to internal tooling projects using HTML, JavaScript, and Java under the guidance of senior engineers, applying enterprise coding standards and agile development practices.

PROJECTS

CAFESTO – Food Ordering Web App | React, Spring Boot, Firebase, Stripe, SQL, JWT | [Link](#)

- Built a full-stack food ordering platform featuring Google and Facebook OAuth via Firebase, real-time order tracking, and Stripe payment integration—handling end-to-end user flow from authentication to checkout.

BLOGAPP – Mobile Blogging Platform | React Native, Spring Boot, SQL, JWT | [Link](#) (FrontEnd) | [Link](#) (BackEnd)

- Developed a cross-platform mobile blogging app with full CRUD functionality for blog management; secured with JWT authentication and backed by a Spring Boot REST API with SQL persistence.

EDUCATION

Vasavi College of Engineering | Hyderabad, TS

Bachelor of Engineering, Computer Science | CGPA: 8.32 | Aug 2019 – May 2023

ACHIEVEMENTS & CERTIFICATIONS

- **POB Award, Octave (formerly Hexagon)** – Individually identified and resolved a critical production crash affecting OnCall Mobile dispatch operations, earning a peer-nominated recognition award.
- **Team Award, Octave (formerly Hexagon)** – Recognized as part of the core team delivering a major new feature release for the OnCall platform.
